

HANDOVER POLICY AND PROCEDURES

This policy provides guidance to all staff of Snapnet on how a handover document should be prepared, to ensure that there is no gap in the period while they are away from their duties, or when a staff is exiting the organization.

Policy Objectives

There are various instances that call for handover of duties. Staff may need to be away from their official duties on leave, may be transferred to another department, or may need to move on, away from Snapnet, to another organization.

To ensure that productivity is unaffected by the absence of any staff, this policy will prescribe the appropriate steps to be taken when handing over.

This Policy provides guidelines for each department of Snapnet.

The contents of this policy shall be referred to for clarity purposes.

This policy shall be reviewed from time to time to ensure best practice standards are adhered to.

DEFINITIONS

1. **Handover document** - is a factual, detailed report created by the current employee, who is about to leave his/her position, either temporarily or permanently, to assist their successor to carry out his/her duties.
2. **Handover Process** - The handover process is the transferring of jobs and responsibilities from one employee to another.
3. **Temporarily Unavailable** – This is when a staff is unavailable for a short, usually specified period, examples include annual vacation, maternity leave, extended sick leave, extensive training programs, travel for special assignments, or other duties that would not allow them to give the required attention to their regular duties.
4. **Permanent Exit** – This occurs when a staff is leaving their current position and would not return to it. It could be because of a transfer to a new role, a new department, another location or branch, or a departure from the organization.

5. **Off Boarding** - Offboarding is the process of disengaging an employee from their position within a company, a practice used both for employees who choose to leave and for those who are laid off.
6. **Work Shadowing** – This is a part of the handover process when the incumbent and the successor work together for a period of time. This allows the new staff carry out tasks under the guidance of the exiting employee and ask any questions that may arise.

POLICY GUIDELINES

a. Who should prepare a hand over report?

A hand over report should be prepared by any staff who will be exiting their current role on a temporary or permanent basis.

b. When should a handover document be prepared?

- When a staff member is going to be temporarily unavailable, the report should be prepared as soon as they receive approval from the line manager to proceed on their leave/vacation, or whatever will be making them unavailable for the specified period.
- When a staff member is exiting the company, the report should be prepared as soon as they hand in their resignation letter or as soon as the company gives them a notice of disengagement.

c. What should a hand over report contain?

The handover document should contain but is not limited to the following:

- A description of daily tasks and processes.
- Key day-to-day activities.
- Access to all relevant spreadsheets and files.
- Project deadlines and status updates.
- Information about any regular/recurring meetings.
- A list of key contacts – customers, clients, stakeholders, managers.
- Any ongoing issues affecting projects.
- Details of all logins and passwords.
- Housekeeping – location of keys, stationery, tools etc.

d. What is the Handover procedure when a staff is going to be temporarily unavailable?

- The staff obtains requisite approval for being unavailable.
- The line manager who gives approval chooses a stand-in for the staff who will be unavailable.

- The staff begins the handover process immediately once approval is received, by contacting the stand-in and preparing the handover document.
- The stand-in begins to shadow the exiting staff.
- The line manager reviews the handover document and inquires if all information has been given to the stand-in.
- The staff will be allowed to proceed if the line manager gives clearance on the handover process.

e. **What is the Handover procedure when a staff exits the organization?**

- The staff hands in their letter of resignation.
- After the line manager accepts the resignation, a replacement is named for the staff who has resigned.
- The staff begins the handover process immediately the replacement is named by preparing the handover document.
- The replacement begins to shadow the exiting staff.
- The line manager reviews the handover document and inquires if all information has been given to the replacement.
- The staff will be allowed to proceed if the line manager gives clearance on the handover process.

f. **Who should oversee the handover procedure and review the handover document?**

The line manager should oversee the handover procedure for their team and ensure the completeness and correctness of any hand over report submitted by an exiting staff.

g. **Can a handover document be rejected?**

Where the handover document does not sufficiently capture the duties, necessary information and vitals that concern the role, the line manager can reject it and refuse the staff from proceeding.

Where the report of an exiting staff is insufficient, and the staff does not want to adjust it to meet required standards, the line manager may alert the human resources department, which would stem the exiting staff until they fulfill protocols required of them.

HANDOVER PROCEDURE

1. **Discuss the handover with your manager:** Start by having a detailed discussion with your line manager to determine exactly how they want you to handle the handover.
2. **Draw up an early outline of your handover document:** Once you have a clear idea of your manager's expectations, draw up a draft handover document. This will help you to organize yourself and catalogue all the various tasks and pieces of information that you will need to pass on during the handover period.
3. **Tie up loose ends:** Put in a little extra work to make sure that you tie up any loose ends. You will get a sense of satisfaction at achieving this, and you will also be helping your successor start off with a clean slate. Doing this will also help ensure that you leave on excellent terms and with a good reputation.
4. Let your manager and/or colleagues know what deliverables and milestones you will have completed before your last day.
5. **Communicate with your colleagues.** Before your successor is due to start, try to make some time to talk to your colleagues about the handover and ask if there is anything your colleagues think you should highlight. If there is a developing issue that you are unaware of, this is a good opportunity to touch base and find out.
 - Developing issues are not likely to affect your final days, but if you are aware of them then you can flag them up to your successor.
 - This is also a chance to make sure everyone knows you're leaving and when. Let your colleagues know about the handover period, so that they can take it into consideration.
 - If you are exiting the organization, your productivity is likely to slow during the handover, so it's good practice to give your colleagues some advance warning.
6. **Write up a formal handover document:** The final step of your handover preparation is to complete a formal handover document. You can build on the draft document by elaborating and including all the important information.

Have a run through the document with your line manager and any other key staff it will affect. Try to have the handover document completed and sent to your line manager and successor at least a few days before they are set to start.

The content will vary from job to job, but it may include some of the following:

- A list and timetable of actions.
 - A briefing of ongoing issues.
 - A calendar of forthcoming events and deadlines.
 - Passwords and login information.
 - A list of useful contacts.
 - A guide to navigating files and folders on the computer system.
7. **Hand over key documents personally:** During the handover, it is good practice to ensure that all the key pieces of data and documentation are handed over personally. This will help you to make sure that the most important things are dealt with appropriately and priorities are clearly set out. Handing over documents face-to-face means that complex information can be discussed fully before you leave.
- This is an opportunity to explain key information, and for your successor to ask you direct questions.
8. **Make the effort to help.** If you are in the office with your successor, you should always be attentive and proactive. Make the effort to identify and help resolve any occurring issues. Your successor may be a little shy or intimidated in their first few days and may not want to hassle you with questions.
- Make sure you make it clear that you are there to help, and you welcome queries.
 - By doing this, you will be helping to foster a situation in which the responsibility for the handover is shared between you and your successor.
9. **Have a final handover meeting:** The last thing to do before you leave and complete the handover, is to do full handover meeting with your line manager and successor. Ask your successor to bring along any outstanding questions they have, and the notes they have made. This meeting is a great opportunity for the new person to ensure that they understand their role and responsibilities. Any uncertainties can be cleared up in the meeting.

10. The exiting staff should provide contact details in case the need arises to reach out.

The appendices provide the requirements each department requires from its staff who may have to prepare a handover document.

APPENDICES

1.0 BUSINESS APPLICATIONS HAND OVER TEMPLATE

Name:

Job Title:

Date of Handover Note:

Brief Description of Duties:

Manager:

1. Activities:

S/N	PROJECT ACTIVITIES	PLATFORMS	FREQUENCY

2. Status of recent and current projects/opportunity you are worked/working on.

S/N	Account	Name of Project/opportunity	Status	Action Needed	Contact Persons	Criticality

2. Required External Contacts:

S/N	Contact	Client	Phone	E-mail

3. Your contact information:

- Phone:
- Email:

4. Work tool information:

- Laptop username:
- Password:

5. Where to find files:

2.0 CSI HANDOVER TEMPLATE

Name:

Department:

Designation:

Technical Documentation:

1. Architecture Diagrams
2. Infrastructure configuration
3. Deployment Procedures
4. Network topology
5. Security controls
6. User and Access management
7. System integrations and API documentation

Training and Knowledge Transfer:

1. Scheduled training sessions to cover the relevant areas of the cloud solution.
2. Shadowing opportunities with the outgoing cloud engineer
3. Access to relevant documentation and resources for ongoing support
4. Q&A sessions to clarify any outstanding questions and concerns.

Access Control:

1. User accounts and permissions
2. Encryption keys and certificates
3. Secret keys and access tokens
4. SSH and RDP access to servers

SN	DEVICE	STATUS	COMMENT

Checklist:

1. Technical documentation is up-to-date and accurate.
2. The relevant team members have the necessary training and knowledge to manage and maintain the cloud solution.

3. Access control for the cloud solution has been handed over to the relevant team members.
4. All open issues and concerns have been addressed before the handover.
5. A plan is in place for ongoing support and maintenance of the cloud solution.

3.0 PROJECT MANAGEMENT TEAM TEMPLATE

All project credential information is uploaded on the Teams channel for Project Team.

Personal Credentials

Snapnet Email:

Email:

Password:

1. Project Overview: A brief overview of the projects being handed over, including the objectives, scope, timeline.
2. Project Status: A current update on the status of each project, including any open issues, risks or challenges that need to be addressed.
3. Key Stakeholders: A list of key stakeholders for each project, including their roles, responsibilities, and contact information.
4. Project Documentation: All relevant project documents such as project plans, reports, and presentations.
5. Key decisions: Highlight important decisions made during each project.
6. Resource Information: A list of all the resources used on each project, including manpower, equipment, and materials.
7. Next Steps: A clear plan of action for the next project manager that will be taking over the projects, including deadlines and key deliverables.
8. External dependencies: A list of any external dependencies that each project has, including contractors, vendors, or other organizations.
9. Communication channels: Provide information about the communication channels used for each project, such as emails, MS Teams. (the resource taking over should be included in all mails)
10. Lessons learned: Any lessons learned during the project that could be useful for future projects.

Handed Over By:		
Handover Personal Contact By:	Personal email:	Num:
Taken Over By:		

HANDOVER	
Subject of Handover	
Handover method (is it physical/email or recorded video meeting)	

PRODUCT/FEATURE OBJECTIVE (In summary, what is the client's desired goal, scope, and purpose for the feature/product?)

TECHNICAL DETAILS
(please provide the programming language used, design architecture, data model, specific coding conventions or guidelines that you followed, and any other framework or libraries used so far)

DEPLOYMENT DETAILS (Please, describe how the project is deployed and hosted. Also include the infrastructure and all tools used to manage the deployment process)

DOCUMENTATION: (Please provide links to any documentation that is available, including design document, technical specifications, and user manual)

BUGS & ISSUES (Provide a list of any known bugs or issues, as well as any known workarounds or possible solutions).

Bugs & Issues

Solutions/Workarounds

FUTURE WORK: (Please, state any pending features, modifications, or enhancements that you were working on, the status and the next steps that should be taken)

6.0 DATA ANALYTICS & AI HANDOVER TEMPLATE

Name:

Department:

Designation:

A. Technical Project Documentation should contain the following:

- Source System
- Data Transformation and Modelling
- Architecture Diagrams/Screenshot
- The various calculated columns and measures that were created for each table (Power BI).
- Deployment Procedure

B. For Project that involve SSIS, SSAS, SQL etc,

The necessary steps taken should be clearly stated with an architectural diagram or screenshot.

C. Training and Knowledge Transfer:

- Scheduled training sessions to cover the relevant areas of the SSIS, SSAS, SQL Power BI etc
- Access to relevant documentation and resources for ongoing support
- Q&A sessions to clarify any outstanding questions and concerns.

D. Checklist:

- Technical documentation is up-to-date and accurate.
- The relevant team members have the necessary training and knowledge to manage and maintain projects that is/are on-going and support.
- All open issues and concerns have been addressed before the handover.
- A plan is in place for ongoing support and maintenance of the cloud solution.

This policy is subject to review from time to time as required and at the discretion of Management of Snapnet.
